

EUROA HEALTH AND GV HEALTH: PARTNERING FOR A HEALTHY EUROA

From 1 July 2024, Euroa Health's acute care services, including hospital-based, urgent care and medical imaging, will transition to GV Health.

The GraniteHill Aged Care facility and other community services will continue to be delivered by Euroa Health.

What is the current status of the acute care services transition?

- An implementation plan is underway to ensure a smooth transition on 1 July 2024. This includes several key strategies and initiatives.
- An interim Euroa Integration Community Reference Group is being established to consult with GV Health, Euroa Health and the community on various aspects of the transition. One of the first items of business for the Group will be to assist in naming the acute care services campus in Euroa.
- A Director of Nursing/Campus Manager position has been advertised.

What's happening next?

- In the next month, the GV Health implementation team will continue to work closely with Euroa Health to ensure a smooth transition of existing services.
- The Euroa Integration Community Reference Group will be set up and actively consulted to support the transition.
- Community members will be asked to vote on a new name for the acute care services campus in Euroa. More information on how to do this will be advised closer to the time.
- The establishment of new leadership at GV Health's Euroa campus will begin. They will help guide current Euroa acute care staff through the transition from a private to public healthcare setting.

Melissa Seymour,
Euroa Health Chief Executive Officer

"I am very pleased with the progress of the transition activities to date. I am looking forward to working with the new Euroa Integration Community Reference Group when they are established to also support a smooth transition of Euroa's acute care services to GV Health."

Matt Sharp,
GV Health Chief Executive

"GV Health is committed to ensuring that acute care services currently delivered by Euroa Health will continue from the transition date of 1 July 2024 - so that Euroa and Strathbogie Shire residents have access to local acute care services, for the long-term."
