

Position Description

Position Title:	Nurse Practitioner - Inflammatory Bowel Disease
Reports to:	Nurse Unit Manager - Specialist Consulting Suites
Department:	Specialist Consulting Suites
Directorate:	Clinical Operations
Cost centre:	C0002
Code & classification:	Nurse Practitioner (NO1 – NO2)
Employment conditions:	Nurses and Midwives (Victorian Public Health Sector) (Single Interest Employers) Enterprise Agreement 2024-2028 and its successors, and GV Health Policies and Procedures (and as varied from time to time)

GV Health is an equal opportunity employer and continually strives to build a diverse, equitable and inclusive workforce that reflects our community. We encourage applications from people of all backgrounds.

Statements included in this position description are intended to reflect in general the duties and responsibilities of the position. It is not intended to be an exhaustive list of responsibilities, duties and skills required. GV Health may alter the duties of this position description if and when the need arises. Any such changes will be made in consultation with the affected employee(s).

POSITION SUMMARY

The Inflammatory Bowel Disease (IBD) Nurse Practitioner works in consultation and collaboration with medical, nursing and allied health staff to assist in the care and coordination for patients referred to GV Health for the treatment and management of inflammatory bowel disease.

The scope of practice of the clinician is determined by the context in which the IBD Nurse Practitioner is credentialed by GV Health to practice. The IBD Nurse Practitioner's Model of Care is determined by their scope of practice, aligned with the strategic plan pillars of GV Health and will be supported by protocols and guidelines.

The endorsed Nurse Practitioner is a registered practitioner by the NMBA. The IBD Nurse Practitioner meets and complies with the Nurse Practitioner standards for practice, has direct clinical contact and practises within their scope under the legislatively protected title 'Nurse Practitioner' under the National Law. The IBD Nurse Practitioner conducts advanced, comprehensive and holistic health assessments to clients within our community.

The protected title of Nurse Practitioner allows the nurse to apply diagnostics, prescribes to their endorsed notation and implements therapeutic interventions to plan and evaluate quality care that is safe and evidence based. The IBD Nurse Practitioner's assessment and early intervention includes collaborative care where referral to and from other clinicians is required to assist with the management of the client. The IBD Nurse Practitioner will provide a clinical consultancy service for the Shepparton area and the greater community within our Region.

RESPONSIBILITIES AND DUTIES

The following duties are inclusive of but not limited to:

CLINICAL CARE

- Provide a high quality timely expert IBD service which includes advice and consultancy through a Nurse Practitioner-led clinic to clients within our community and internal clients of GV Health that reflects best practice and adds value to GV Health
- Establish a telephone and email support service for the management of patients with IBD as first port of call.
- Contribute to a transdisciplinary model of care program incorporating Gastroenterologist, Dietitian, Pharmacist, Endoscopy, Pathologist and Radiologist, Dermatology, Rheumatology and other Specialist as required
- Aims to provide a point of care to community patients: prior to diagnosis, to prevent and manage flare, to be a liaison for GP's within our region.
- Involvement and facilitation of visits for patients requiring access to biologic medication management with an understanding of regulatory Medicare and PBS administrative requirement.
- Provide initial screening, ongoing monitoring and education of patient during induction treatment phase and maintenance therapy. This may include close monitoring of required pathology, histology and/or radiology exams, escalating abnormal results for timely intervention where required to the IBD team.
- This role will incorporate an inpatient component to include but not limited to: safeguard immunosuppressed clients, reduce Emergency Department presentation, reduce length of stay and to better manage capacity of this client group
- Assessing and developing client-centred evidence-based assessment and management plans with a focus on clients with complex and chronic IBD signs and symptoms relevant to the scope of practice and identify need for admission to hospital and escalation of care required
- Providing advanced clinical practice to include care coordination, assessment, planning, education, review, case conferencing and discharge of referred clients within the professional boundaries and responsibilities of the nurse and the organisation
- Ensure consumers, families/representatives or carers are provided with timely information and are involved in decision making about their care planning and treatment
- Accept accountability for own actions and seek guidance when a situation exceeds experience and/or knowledge
- Uphold and protect consumer rights, maintain strict confidentiality and continually practice to the principles of open disclosure
- Consumer feedback and complaints are responded to appropriately to ensure that issues are resolved and quality and safe clinical care is provided
- Maintain accurate and current clinical records ensuring documentation meets professional and legal standards
- Working in partnership with key stakeholders to build staff capacity in assessing and managing IBD and utilizing an evidence-based approach to clinical decision-making
- Maintaining open and effective channels of communication with clients and their families/carers, professional colleagues, the health care team and external service providers

SUPPORT OF SYSTEMS

The Nurse Practitioner works autonomously as a clinical leader within GV Health who can influence other clinicians to improve the patient experience. The Nurse Practitioner collaborates with other clinicians through sharing, supporting, giving and receiving referrals that improves the efficacy of care provided. They have the capacity to explore, strengthen and influence processes and systems to embed a client centred culture for internal or external care.

The duties and responsibilities of the role of this position can achieve the support of system clinical domain of practice by:

- Understanding outpatient clinic booking templates and wait lists in order to optimise patient flow from time of referral through to appointment and or procedures.
- Develop and implement effective guidelines to accommodate new referrals and existing patient to ensure equitable and clinically appropriate access to clients with IBD.
- Facilitating links with existing key stakeholders in IBD across the state.
- Involvement in committee's relevant to the nurse's scope of practice.
- Supporting clinicians within our community to alleviate barriers and promote enablers to ensure clients receive the best possible care.
- Building capacity in the Greater Shepparton region for health workers who care for clients with IBD.
- Identifying opportunities for new service initiatives through the evaluation of existing services.
- Working within the interdisciplinary health care team, contributing and supporting the development of strategies to measure clinical management and outcomes of care.
- Assist the organisation in achieving clinical effectiveness by providing the appropriate systems, information or services to clinical areas.
- Collaborate and communicate with all members of the health care team to achieve desired consumer outcomes.

EDUCATION

The Nurse Practitioner is proactive and analytical in acquiring new skills and knowledge and utilises this direct care and the education of others. Education enhances the involvement and active participation of client, caregivers and clinicians. The Nurse Practitioner educates the public and increases awareness to the benefits of wellness, health and prevention of illness. They work collaboratively in educating and supporting others as mentors within clinical care and professional development including informal and formal staff development.

The duties and responsibilities of the role of this position can achieve the Education clinical domain of practice by:

- To be actively involved in increasing awareness, education and training to clinicians and the community on IBD
- Maintain and demonstrate regulated clinical skills and competencies by undertaking professional development and completing mandatory training as defined by GV Health
- Undertake credentialing and review scope of practice
- Continuing professional development for self so that new information can improve the care provided and lead others
- Being involved in identifying learning and practice gaps and contributing to education programs and resources
- Engagement in clinical education, guidance and mentorship and professional activities that assist the development of extensions to practice.
- Increasing awareness to promote health and wellbeing for all on the topics of IBD

- Actively participate in identifying where improvements can be made to the quality of consumer care

RESEARCH

The Nurse Practitioner critically evaluates and integrates relevant research findings into practice and more broadly through publication and presentations. They contribute to development of evidence-based clinical guidelines, standard work place documents, policy and procedures within GV Health and beyond. The Nurse Practitioner advocates on behalf of the client to receive care that is safe, effective and evidence based. The Nurse Practitioner supports and strengthens a culture that seeks better outcomes for clients through evaluating care provision, collecting data, conducting clinical research, involvement in quality activities and risk management strategies.

The duties and responsibilities of the role of this position can achieve the Research clinical domain of practice by:

- Being aware of what is available and how to access new and developing research that will assist with delivering evidence-based care to the client
- Developing clinical guidelines, standard work place practice documents, policy and procedure documents to assist clinicians to deliver best practice
- Contributing to the quality assurance activities at GV Health through; innovation, data collection, changes to process and systems, education risk mitigation,
- Contribute to new evidence through research

LEADERSHIP

The Nurse Practitioner demonstrates innovative ways to provide care ensuring care is dynamic and meets the needs of the client, the clinician and the services within our community. They provide clinical leadership that influences partnerships, clinical care, policy and collaboration throughout the continuum of care at GV Health and the wider health services. The Nurse Practitioner demonstrates leadership to build, inspire, advocate, evaluate and develop adaptive models of care and facilitates the development of a nursing workforce that enhances the health and wellbeing of our community. This incorporates timely access and equity to quality, cost effective, health care for all.

The duties and responsibilities of the role of this position can achieve the Leadership clinical domain of practice by:

- Demonstrating clinical leadership, mentoring, support and the development of others by acting as a resource to colleagues
- Facilitate and contribute to interdisciplinary health care team meetings and clinical education sessions to facilitate consumer care goals
- Engaging in opportunities of research, journal writing and conference participation
- Participate in committees and professional groups and disseminate relevant information to other health care professionals
- Actively engage and promote the role with relevant regional, state and national agencies
- Undertake credentialing and review of scope of practice and work within these
- Improve performance by seeking feedback, setting goals and participating
