

Want to learn more about GV Health's Public Fertility Service?

Did you know GV Health has partnered with The Royal Women's Hospital to make fertility care more accessible in our region? GV Health now offers access to comprehensive, world-class fertility treatment including genetic counselling, fertility preservation, fertility assessment and treatment.

On Monday 7 April we will be running an online information session and Q&A for all community members interested in learning more about this service.

Scan the QR code or visit the GV Health Facebook page to join our online information session - 7.30pm, Monday 7 April.
