Any such changes will be made in consultation with the affected employee(s).

POSITION SUMMARY

The Safety, Quality & Experience Coordinator is primarily responsible for the coordination of safety, quality, risk and innovation activities across clinical divisions. In taking the functions of the Quality, Risk and Innovation Unit to the forefront of patient care, this role supports all staff to understand their department's safety, quality and consumer experience performance and associated opportunities for improvement.

The Safety, Quality & Experience Coordinator works in partnership with senior clinical leaders to continuously improve the safety and quality services and in turn improve consumer and staff experience.

RESPONSIBILITIES AND DUTIES

The following duties are inclusive of but not limited to the following:

- The Safety, Quality and Experience Coordinator has responsibility for a division/s and quality standard/s in a business partner model.
- Allied Health/ NSQHS Standard 2 Partnering with Consumers/ Clinical Care Standards
- Work with the departments within your division to understand safety, quality and experience data supporting teams to use this information to continuously improve safety and quality of services and in turn experience.

- Support the team in reporting and monitoring of quality targets and KPI's and coach the team in improvement methodology to achieve desired outcomes.
- Promote the systems and processes that support clinical governance and the process of continuous improvement
- Support all staff in understanding their role and responsibility for safety, quality improvement and experience relative to their position
- Provide education to staff and management, supporting them to understand their safety, quality and experience responsibilities relative to their role and department's performance and continuous improvement of this.
- Lead by example safety, quality and experience and demonstrate the CREATE values and behaviours of GV Health.
- Engage and communicate effectively with all staff.
- Assist the organisation in achieving clinical effectiveness by providing the appropriate systems, information or services to clinical areas.
- Provide reports and information to divisional key stakeholders, standards lead and the Safety, Quality & Experience Manager on matters of patient safety and risk improvement.
- Attend and contribute to operational/unit meetings, divisional/directorate meetings, accreditation/standards meetings, and morbidity and mortality meetings.
- Working with the Safety, Quality & Experience Manager and other Safety, Quality & Experience Coordinators, contribute to GV Health's accreditation and compliance requirements across all required standards.
- Support divisional areas to ensure readiness for accreditation(s).
- Provide support for accreditation and standard requirements by working with senior clinicians to complete standard self-assessments, write progress reports against recommendations and agreed actions.
- Complete documentation requirements for various accreditation bodies.
- Contribute to the delivery of the accreditation schedule and the development and review of accreditation approaches as accreditation requirements evolve.
- Act as a liaison with senior clinicians in translating the requirements of standards and act as an expert resource to assist the organisation to meet those standards.
- Support the accreditation Standard Lead and Executive Sponsor in matters related to accreditation.
- Attend and provide advice and support for the standard committees/meetings/huddles
- Build key relationships with departments and divisions to implement clinical and strategic priorities.
- Actively promote GV Health's model for improvement and act as a resource to support staff using improvement methodologies
- Work with staff, managers and senior clinical leaders to understand their relevant safety, quality and consumer experience data and how this drives the plans for continuous improvement of their department/ division.
- Support staff to use and monitor their plans for continuous improvement and celebrate success from change.
- Work collaboratively with the Quality, Risk and Innovation Unit, managers and clinical staff to develop, implement, monitor and evaluate evidence based clinical practice improvement strategies.
- Work with the Quality Systems Lead and Performance Analyst / Risk Lead and Performance Analyst to provide reports on metrics and performance indicators of functions of the Quality, Risk and Innovation Unit, relevant to the division/s and standards.
- Monitor quality data used to report divisional activity and performance and develop and recommend processes to improve patient safety and quality outcomes.

- Develop and monitor relevant reports of safety and quality including internal and external data indicators. o Provide leadership and specialist advice to support the organisation's continuous improvement of clinical governance.
- Champion the Consumer Partners & Representatives program growing consumer involvement in improvement.
- Establish and foster strategic relationships with external bodies such as Safer Care Victoria (SCV), the Australian Commission on Safety and Quality in Health Care (ACQHSS), the Australian Council on Healthcare Standards (ACHS) and the Victorian Agency for Health Information (VAHI).
- Establish strong interpersonal and professional relationships with clinicians and managers across the organisation to support their safety and quality endeavours whilst promoting a culture of safety and quality, high professional standards, and positive culture.
- Monitor incidents within the division and standard applying the "Incident Business Rules" within the Quality, Risk and Innovation Unit to respond to incidents, alert appropriate staff to incidents and determine the validity of incidents.
- Support the clinical division to respond to clinical incidents including in-depth case reviews (IDCR) and Root Cause Analysis (RCA) as required for serious incidents i.e. Incident Severity Rating (ISR) 1 and 2 incidents.
- Support staff in the process of open disclosure and actively participate as required in Statutory Duty of Candour and Serious Adverse Patient Safety Event (SAPSE) reviews.
- Maintain the system for monitoring the progress of recommendations and record progress within the system.
- Support departments in the implementation of recommendations that arise from the process of incident review, to continuously improve safety and quality systems.
- Work to continuously improve the system and processes of incident management.
- Monitor feedback within the division and standard applying the "Feedback Business Rules" within the Quality, Risk and Innovation Unit to respond to feedback, alert appropriate staff to feedback.
- Work with staff, managers and senior clinical leaders to investigate and respond to complaints and provide expert clinical review as required.
- Work with staff, managers and senior clinical leaders to understand and respond to the themes arising from feedback to continuously improve safety, quality and consumer experience.
- Support staff in the process of, and participate as required in feedback resolution meetings.
- Support staff in the process of Open Disclosure and actively participate as required in Statutory Duty of Candour and SAPSE reviews.
- Work to continuously improve the systems and processes of feedback management.
- Champion the Consumer Partners & Representatives program, implementing and growing the opportunities for consumer involvement in departments/divisions/standards.
- Work with the Risk Lead & Performance Analyst to conduct risk assessments within the division or standard group, monitoring controls and coordinate the review of risks using the risk module in Riskman.
- Provide education and support to clinicians in the identification, assessment and mitigation of risk within divisions and standards.
- Work with staff and managers to embed and continuously improve the processes of risk management within their departments/divisions/standard.
- Contribute to an organisational culture of safety and quality, in which patient safety and clinical risk management becomes an integral part of core business.
- Work with clinicians to reduce healthcare errors and other factors that contribute to unintended adverse patient outcomes.

- Work with senior leaders and managers to monitor the currency of controlled documents (eg: policy, procedure and consumer publications) and aid in the development, prioritisation and review of these documents.
- Work to continuously improve the systems and processes for controlled documents.
- Provide expert advice on system and process development to inform the review of controlled documents to align with best practice and contemporary evidence
